

The Planning Commission met in council chambers at 7:00 pm with Tony Salvatori, Chris Reed, and Don King in attendance.

We heard information given on The Hutchinson Project. We reiterated that as long as our Borough Engineer is satisfied with the work accomplished we have given our green light to the project. They said that they will reappear to present a subterranean atrium entrance that will allow them to utilize even more of a building that is fully occupied. Dan Mathers appeared with Mr. Hutchinson on behalf of that project.

Chad Hall presented a proposal for a football field partly occupying the former pool area. A number of folks presented ideas including Dick Everett, Louis Bassler, John Dorin, Ron Shearer, Dennis Holt, and Councilman Boyles. Don King introduced his own brainstorm ideas on the entire park complex.

In the end, Planning Commission recommended to council that a study of the park by a professional group be initiated to form a master plan for our park areas. We also urged Council to name a citizens commission of borough residents only to help to oversee the park.

Chad Hall was instructed to contact Bob Lorson, the School Board President to confirm the use of the field they have been using at the Middle School. The Planning Commission does wish to satisfy the need for recreation that includes Pop Warner Football.

The meeting ended at 8:20.

Respectfully submitted,

Don King
